

Base Year Modification Request Certification

Part 1: Generation Study - No Extrapolation Diversion Data

To request a substitution for a previously approved base-year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to be connected to your OLA representative.

Mail completed documents to:

California Integrated Waste Management Board
Office of Local Assistance
1001 I Street, 9th Floor
PO Box 4025
Sacramento, CA 95812-4025

General Instructions:

Please select the **ONE** choice below that best explains your request to the Board.

- ☐ 1. Use a recent generation-based study to calculate our current reporting-year generation amount, but not officially change our existing Board-approved base year.
- ☒ 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative.

Section I: Jurisdiction Information and Certification			
All respondents must complete this section.			
I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:			
Jurisdiction Name		County	
City of Stockton		San Joaquin	
Authorized Signature		Title	
<i>Michael Miller</i>		<i>Solid Waste Manager</i>	
Type/Print Name of Person Signing	Date	Phone () Include Area Code	
Michael Miller, Solid Waste Manager	10-12-01	209-937-8826	
Person Completing This Form (please print or type)		Title	
Michael Miller, Solid Waste Manager			
Affiliation:	City of Stockton		
Mailing Address	City	State	ZIP Code
425 North El Dorado Street	Stockton	CA	95202
E-mail address <u>mike.miller@ci.stockton.ca.us</u>			

Section II: Information for New Generation-Based Study for Existing or New Base Year

Attach additional sheets if necessary— reference each response to the appropriate cell number (e.g., 4).

Note: New base years must be representative of a jurisdiction's disposal and diversion.

1. Current Board-approved existing base-year:

1990

2. Proposed new generation-based study year:

2000

3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:

The previous study does not adequately represent the impact of the implemented diversion programs and of the increase in the growth of industry and construction over the last 8 years. The City benefited from the economic boom and there has been significant population and commercial/industry growth. Industrial / commercial growth has been growing along with the growth and expansion of Silicon Valley. Much more accurate disposal numbers are available because of the implementation of the Disposal Reporting System and because of diversion reporting required of the haulers and recyclers.

4. Enter your diversion rates below.

Diversion rate calculated using existing base year	a. 15 %	Diversion rate calculated using new generation-based study	b. 56 %
For existing base year pounds/person/day based on generation	7.8	For new generation based study pounds/person/day based on generation	14.7
Residential generation 52 %	Non-Residential Generation 48 %	Residential generation 18% %	Non-Residential generation 82% %
Population existing generation-based study 215,000		Population new generation-based study 247,800	

5. If there is an increase between 4a and 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide any examples, e.g. change in jurisdiction's demographics.

The diversion programs described in the PARIS have had significant impact in reducing and recycling the waste stream in the City of Stockton and the use of the CIWMB Adjustment Method does not accurately reflect the diversion rate of the implemented programs. Continuing construction and growth in the commercial / industrial sector is not adequately addressed by the Adjustment Method. The 2000 Waste Generation Study also identifies previously undocumented diversion by third party recyclers (other than haulers) and by businesses themselves. These diversion activities were not adequately addressed in the original 1990 base year study.

6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)

The City of Stockton has implemented a significant number of diversion programs since 1990. The curbside programs have been expanded and the City has actively promoted independent recyclers. Regional materials recovery facilities and regional construction and demolition facilities not in existence in 1990 have been built to service the waste generators in the City of Stockton. The private sector has also implemented a significant number of programs which the City did not previously document.

7. Disposal Tonnage: (enter values)	65952	230150	296101
	Residential	Non-Residential	Total

Please select the **ONE** choice below that best explains your disposal data and complete the required tables.

☐ a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)

☐ b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Request and Modification Certification sheet found at <http://www.clwmb.ca.gov/lcentral/forms/rytnmdrq.doc>)

☒ c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at <http://www.clwmb.ca.gov/lcentral/forms/rytnmdrq.doc>)

8. In the table below, list the summarized diversion activities, and diversion data records that support your claim and are available for Board audit. (Note: The Board expects the jurisdictions to be able to provide all back-up documentation, if requested) Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (form will perform all addition calculations). If any diversion is from restricted wastes, [agricultural wastes, inert solids (e.g., concrete, asphalt, dirt, etc.), white goods, and scrap metal] please identify those programs/waste types and fill out section 10. Please mark as Attachment 8 all copies of survey forms.

*Please provide detailed non-Residential waste audit information in Section 9.

Note: The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details substantiating your claim.

Diversion Activity	Actual tons	Relative Percent to Total Generation	Specific material type(s) (List operation w/multiple materials in one box)	Specific conversion factor used (if any) and Source	Type of record and location of record

9. Specific Non-Residential Sector Waste Audits-Top 10 Non-Residential Generators

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from largest to smallest, based on total diversion tons. Audit reference number ties to your audit sheets.

(Form will perform all addition calculations).

Please provide an attachment 9 which includes all of the generators surveyed. Include for each generator (use type of generator in lieu of specific business name) diversion activity and material type and associated tonnage for each diversion activity/material type, and applicable conversion factors/sources. Include copies of survey form(s) used.

Type of Non-residential Generator	Audit Reference Number	Specific/Major Diversion Activities Include material type (e.g. paper recycling, grasscycling). (List activities on one line)	Source Reduction Tons	Recycling Tons	Composting Tons	Total Diversion Tons	Percent of Total Generation (Total Diversion Tons/Total Generation in Section 8)	Survey Method Phone (P) Mail (M) On-site (O) Other _____
food processing (tomato)	1	Please see details attached.	8562	171	7590	16322.58	2.4%	onsite visits
Steel sheet distribution	2	Please see details attached.	2	9004		9005.12	1.3%	onsite visits
